

PROPOSAL FIRST GALACTIC HUB

THE FIRST EVER 5D COMMUNITY
New Earth Transitional Government

Galactic Hub Model

The Galactic Hub Model is based on sacred geometry, synergy, unity consciousness, and equal energy exchange. This model ensures that every being fulfills their greatest potential, service, honoring the whole rather than the individual. This is the first Garden of Eden community.

SYNERGY

The Galactic Hub is based on synergy between all beings, between private and shared spaces, and between structure and nature. This community works as a divine ecosystem, with all beings playing a role in the sustainability and thriving of the community.

GARDEN OF EDEN

The Garden of Eden model focuses on creating the grandest space possible for all beings to have joy, creativity, support, compassion, harmony, and love. A fully sustainable community that provides the true heaven on Earth for all members.

Sacred Land

The foundations of the Galactic Hub Community, is the sacredness and intention of the land. The lands of this Earth hold so much trauma and density from taking, war, and domination. Most lands are not acquired with a sacred energy exchange that values the intent of the land.

ENERGY EXCHANGE

The Galactic Hub Community MUST be acquired with an equal energy exchange. This is essential for setting the energetic foundation of the community. This means that the owner and obtainer of the land are both in honor of the intent of the land, and are both giving and receiving the land in the heart.

INTENT

Most land has no sacred intention. Humans have used land to build structures for their own means and resources, destroying the land in the process. The intent of this community must be pure, from start to finish. The intent of the land shall be layed in writing by all members, and the land should be blessed.

Sacred Design

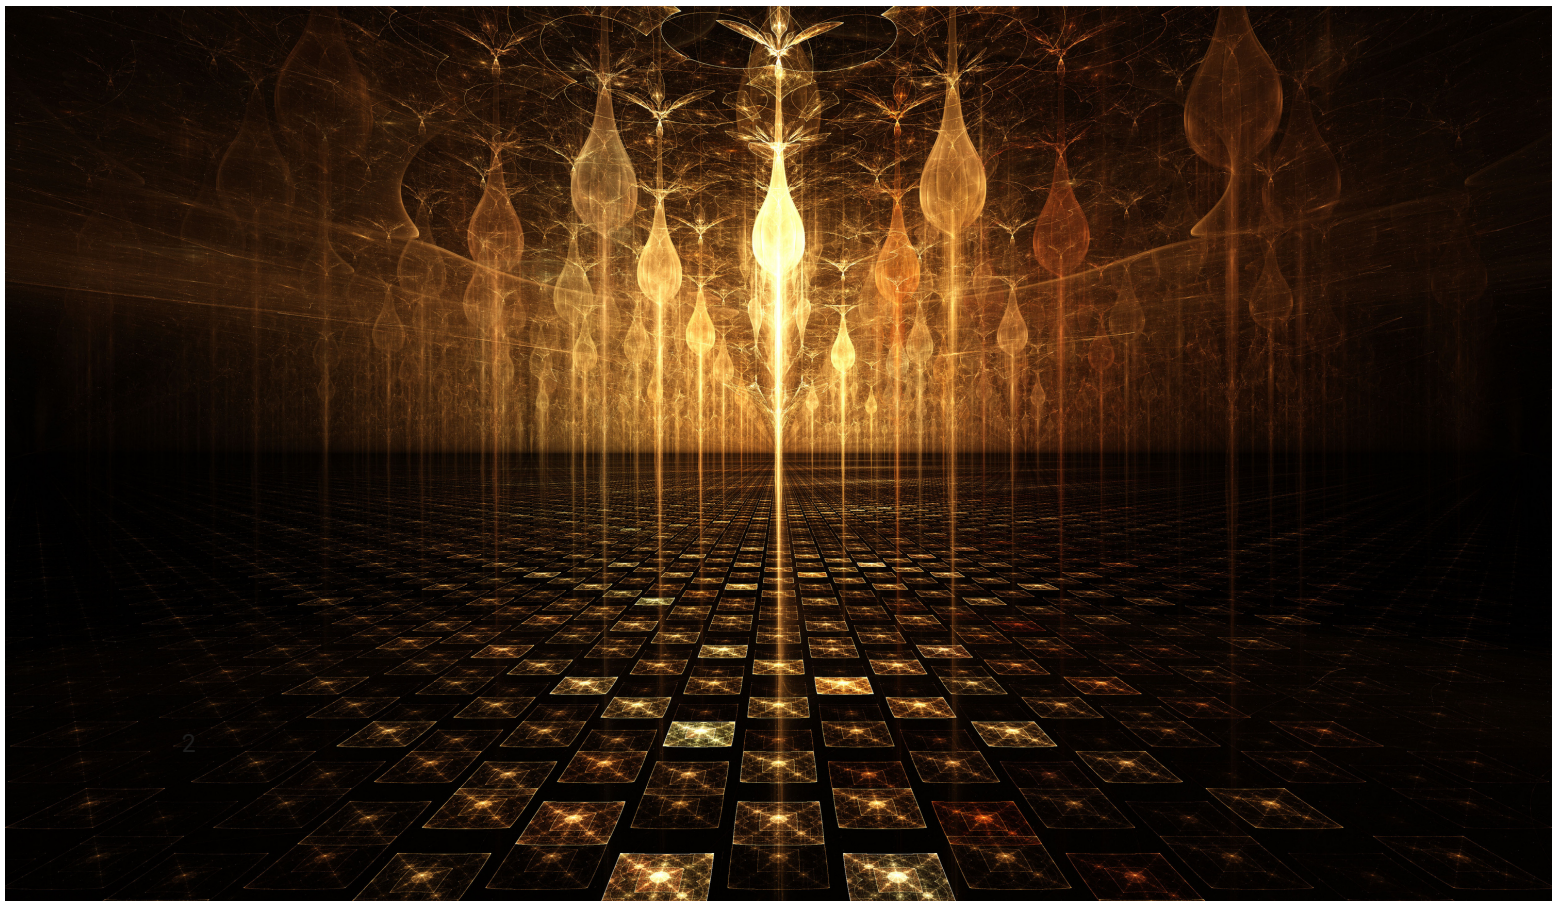

The design and layout of the Galactic Hub Community will be designed and built using sacred geometry, which is essential for the flow and alignment of the community. Most buildings and structures are built outside of sacred geometry, and hold dense energy.

DESIGN

The layout of the community will honor sacred geometry, the ley lines and grids of the land, as well as the elements of the Earth. This community will also be built in alignment with the organic land structures, so as not to disturb the natural ecosystem, but to work with it.

ENERGY INTENTION

The intention of the design and building of the community will be to bring harmony and flow to the community. To allow both community spaces and private spaces. All elements of the layout of the community will be what is highest for the whole.

Building in Harmony

The building of this sacred community will be done by the members of the community, as well as any being who is aligned in love. It is important to have those in the heart building this community to keep the energy of intention flowing into every structure and building in the Hub.

MATERIALS

All materials used in the building of the community will be natural and organic based materials. ECO friendly designs, as well as divine architecture to harness the beauty and natural elements of the Earth will be used. This community will be one with the land.

STRUCTURES

There will be many structures build within the community, and each structure will be built with pure intention for what each space will be used for. Each structure will be guided through Source and energy dedicated to the overall intention of the building.

Sustainable Living

The Galactic Hub Community will be a fully sustainable community that exists off free energy, harmony, self-creations, and crop growing. This community will be responsible for innovation and evolution of its own community and to ensure the whole is thriving.

FREE ENERGY

The community will power itself off of free energy including water power, wind power, solar power, and plasma power. The goal of this community is to work with the natural elements of the Earth to create a pure, non toxic community that does not rely in AI technology.

AGRICULTURE

This community will be responsible for its own growing, harvesting, and food development. Plasma will be infused into the growing and harvesting of crops, herbs, water supply, as well as the development of higher uses for materials and recycling capabilities.

Harmonic Living

This community is built on the foundation of harmonic living. This means that every member of the community is honored and respected for their roles. All beings live in harmony with one another, all in service to the whole. All needs of each being is the responsibility of the entire community.

ROLES

Each being of the community holds a role, but all beings are multidimensional. This is a community where new skills, experiences, and gifts can be developed by learning and trying different things. Each being is able to grow and expand as they feel guided to.

NEEDS OF THE WHOLE

The needs of the community are to be taken care of by ALL. There is no separation at the Galactic Hub. This means individual needs such as food, healing, crystal schools, pure water, creative spaces, emotional support, etc., are all taken care of by all members of the community.
