# PRODUCT INTEGRITY

Product integrity is determined on the basis of the intent of the product, the energy contained within the product, & the consciousness of the producers of the product.

Everything on the planet is energy, therefore any product that we create, and every being who is involved in the creation, production, & packaging of a product effects the integrity of it.

Products include: beauty products (any product designed to be use on the skin or hair), healing products (anything designed to be ingested or used in order to help heal the physical body), apparel (including jewelry, accessories, shoes, etc.), cleaning products, or any item that is designed for the purchase and/or consumption by humanity, excluding food or drinks.

The intent of any product that is being made for the purchase or consumption by humanity must have one of two intentions: to heal or to bring joy. Any intent in the creation of a product that is not pure, such as greed, convenience, or enabling of humanity's dysfunction, will be unsuccessful.

As a product developer, the goal is always to assist humanity in some way. The equal energy exchange laws of the Universe will always bring abundance when the intention is pure and the dedication is put in.

The prices of products are a reflection of the integrity of the product. We are moving out of the system of money but it currently is the tool of equal energy exchange. The price of any product should be equal to its true value: time and energy spent in the development & production of the product, the quality of the ingredients used, & the care taken to deliver the product in the highest form possible. There is no right or wrong “price point” for any product, but it must align with the energy of the product. If any product is undervalued it is a reflection of unworthiness, if any product is overvalued it is a reflection of greed.

It is important to ask for guidance for all products creations as to the correct price. Adjustments can always be made. However, aligned numbers are always a great place to start with products such as \$11.11, \$55.55, \$222.22, etc.

The goal should always be to seek an equal energy exchange with buyers. They receive the value of a product made with love and integrity, and you receive abundance. These must be in balance, or the product will begin to fail in integrity.

The energy of the product is the most important part in any creation or developmental phase. It is vitally important that ALL beings who are involved in these processes are taught and coached on energy & consciousness.

We are moving away from the lower consciousness of huge factories, machine made products, low-paid workers, etc.

The consciousness of all who are involved with creating and producing products put their energy into the products. If there is no joy, integrity, and care, then the product is filled with low consciousness that the customer now absorbs.

The physical/emotional/mental state of all beings involved is the priority for creating success and healing products.

If a being is angry, frustrated, worried, anxious, bored, etc., they should not be involved in the process of product creation until their energy has been stabilized.

The care put into products is also directly connected to its integrity. We have become a society that has turned to machines, robots, & automatic production.

We are in fact returning to more organic, holistic & handmade businesses. This not only creates higher consciousness products, but higher consciousness employees and thus higher integrity products. Big production is no longer aligned for New Earth.

Big production was created in order to maximize profits, which was a low frequency intention.

The larger any business or production gets, it must seek to maintain the integrity of its products. The model of spending less to make more is a 3D model based on lack, greed, and power.

The goal is never to “make money”, but to be of service to humanity. This ensures true abundance which is integrity, joy for both yourself, your employees, & the customer, and to truly bring about a change on the planet.

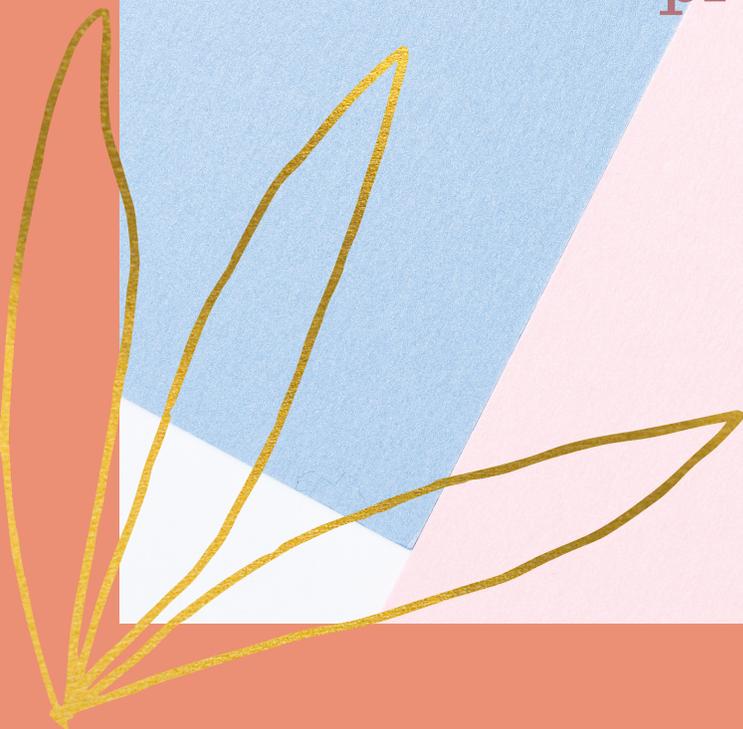

## ALLOWABLE INGREDIENTS

The ingredients used in any product are also a key to the process of integrity. There are many products that use ingredients designed to make the product look a certain way, extend shelf life, or create a larger profit margin. Only whole, pure ingredients may be used in the production of any product.

There are of course, always instances where we may need to use an ingredient that is not 100% organic, and in that case, we use the Dr. Emoto Method of transforming the consciousness of the ingredient.

Any ingredient that is NOT organic or natural from Mother Earth and includes chemicals, must be evaluated by the Product Integrity Council for use in products. All animal and/or human testing regarding ingredients is not allowed.

No living being will be subjected to testing of any harmful or toxic products. This will create the shift into truly holistic and organic products

This will also create a shift in the way that customers purchase products.

Things such as beauty or holistic products are to be made to order, meaning they are not made to have an extended shelf life or the ingredients will perish.

Similarly, products that are created for durable and lasting wear such as clothing, cleaning products, or any item that is designed to be used for long periods of time (years-decades), must be built with the intention to last.

Products that are not built or created with the intention of care and integrity usually break and/or cease working after long periods of use.

We are returning back to products that are created with care and lasting intentions.

The 3D system of pushing for low life span of products was based on the model of repeat customers. In true reality, there will always be being who are in need of your product at the divine timing & there is no need to try and force "repeat" business.

# TRANSFORMING INGREDIENTS

In order to transform ingredients that are not 100% natural, we use the Dr. Emoto method of consciousness. Dr.

Emoto focused his energy on transforming the consciousness of water, however, his methods work for any type of physical item as it all holds energy molecules.

“The extraordinary life work of Dr. Emoto is documented in the New York Times Bestseller, The Hidden Messages in Water. In his book, Dr. Emoto demonstrates how water exposed to loving, benevolent, and compassionate human intention results in aesthetically pleasing physical molecular formations in the water while water exposed to fearful and discordant human intentions results in disconnected, disfigured, and “unpleasant” physical molecular formations. He did this through Magnetic Resonance Analysis technology and high-speed photographs.

His research also showed us how polluted and toxic water, when exposed to prayer and intention can be altered and restored to beautifully formed geometric crystals found in clean, healthy water. The following photos are images of photographs of the the water in the Fujiwara Dam before and after the Reverend Kato Hoki, chief priest of Jyuhouin Temple, offered an hour long prayer over it.

Dr. Masaru Emoto put Water as a Living Consciousness on the map for the scientific world. He showed us how water is an energy capable of more than we ever imagined. The power human thoughts, sounds and intentions has to strengthen and disempower is one of the greatest discoveries of our time.”

This theory of consciousness can be applied to any and everything that we ingest, make, or create. When one practices intention and prayer with anything, it physically changes the structure of molecules.

Any ingredient that holds any form of chemical or toxin can also be transmuted out of an ingredient through the intention of transformation.

A mantra that we recommend is, “I ask for all ingredients to be transformed into the highest organic ingredients, infused with Plasma Rainbow Light, & infused with healing and joy.”

You can also place your hands above the ingredients or products or simply send the intention out through the heart.

Your joy & passion for your product creation is the single most potent energy you can infuse into your creative process. Allow your creativity & your product to keep evolving as you continue to evolve.
