# TECHNOLOGY INTEGRITY CODE

ORGANISED BY:

**NETG**

5D Technology Council

## THE MISSION

The mission is to eliminate the use of lower frequency technology and/or to eliminate the lower agenda usage of technology & instead hold all technology companies & innovators to a code of ethics for the development of any and all technology.

## THE VISION

The vision is to create a world in which technology is used as a means to assist, support, heal & bring joy to humanity. All technology that is used as a means of controlling, spying, manipulating, or taking energy from Humanity and the Planet will no longer be tolerated. This will transition us into organic, higher frequency 5D technology that does not pose a threat to the evolution of Planet Earth.

## GOALS & OBJECTIVES

01

Eliminate lower usages of technology

03

Introduce 5D technology to heal Humanity & Planet Earth.

02

Eliminate AI technology that poses a threat to the evolution & wellbeing of Humanity & the Planet.

04

Replace AI technology with 5D crystal technology that allows for innovation, evolution, & expansion of human consciousness.

## FOCUSES

- Free Energy
- 5D Healing Technology
- Crystal Technology for Manifestation
- Sustainable Energy
- Innovative Technology
- Eliminating AI & replacing with Divine Intelligence
- Eliminating negative effects of technology
- Eliminating technology which is used for destruction rather than creation
- Eliminating technology used to spy, control or manipulate consciousness
- Eliminate technology which does not contribute to the wellbeing of Humanity

# TECHNOLOGY INTEGRITY

Any technology that creates lower frequencies, does not serve the wellbeing of Humanity or Planet Earth, is used to spy/control/manipulate consciousness, or contributes to destruction rather than Creation, will be eliminated, dissolved & removed from the planet.

ALL technology will be evaluated by the 5D Technology Council of the Transitional Government & determined to be:

- Safe for Humanity
- Unsafe for Humanity
- Unsafe but allowed for modification/evolution to be used for a higher purpose

Any technology that is found to be unsafe for Humanity will be immediately recalled, halted, & banned from production/distribution. Any technology that is found to be unsafe but allowed modification, will have 9 months to evolutionize & change the technology to meet safe standards and be reintroduced to the market.

# TECHNOLOGY INTEGRITY

All technology must have one of the following intents/purposes:

- to heal humanity
- to assist humanity in evolution
- to bring joy to humanity
- to bring healing to planet earth
- to expand consciousness
- to assist in innovation, creation or production of a higher consciousness product

Any technology that does not meet the standards of integrity, does not have a higher purpose or intent, will not be allowed to be used, produced or distributed to Humanity.

As we evolutionize as a species, the integrity of those producing technology is of extreme importance, as technology has been used for destructive purposes for thousands of years & has brought pain and suffering to Humanity.

To become a 5D species, we must seek to improve, expand, heal & grow using technology in order to be a vibrational match to true 5D tech.

# FREE ENERGY

The control, hoarding & prevention of free energy will no longer be allowed on Planet Earth.

Any corporation, city/county/state, or entity that seeks to charge money for the use of energy will be shut down and dissolved. All humans on Planet Earth are to have free access to electricity, water, and natural heat/cooling solutions.

All city/counties/states are required to provide:

- free water accessibility + implement technology to clean & purify water.
- free electricity using Plasma Technology, solar panels, wind mills, water power, etc.,
- technology & solutions for heating/cooling for all homes, businesses, & government buildings.

All countries are responsible for ensuring that each citizen is provided with free resources to live, prosper & care for themselves and their communities.

# HEALING TECHNOLOGY

All 5D healing technology, including but not limited to:

- Plasma products
- Med Beds or similar
- organic healing technology such as crystal beds, oxygen therapy, light & sound healing chambers, etc., will be FREE to all of humanity.
- NO healing technology may held back from Humanity, & all costs associated with building and producing the technology will come from the Technology Fund for Planet Earth.
- Individual sellers of the technology may charge a small & reasonable price for the technology that makes it accessible to all beings (all pricing of technology will be subject to the Product Integrity Council).

All healing centers on the planet will be required to have all healing technology available for public use & all funds will be provided by the Global Technology Fund.

## SPIRITUAL CONNECTION

Spiritual connection & consciousness is the key to all 5D technology. This higher technology cannot be accessed or used if the intent of the being is not pure, and if the consciousness is not a match to the technology.

In order for 5D technology to be able to be used for all of humanity, we as a collective must raise our frequency to be able to receive the technology.

Our physical vessels are quantum computers, & we are as powerful as Medbeds. Once we can harness our Spiritual Connection to Source, we begin our self-healing process. This then allows the pathway for more advanced Plasma Technology to unfold and be shared with humanity.

All beings who are working with, developing, & using any kind of 5D technology should focus on their frequency, vibration, & clearness of vessel.

## SOUND/LIGHT HEALING

Sound & light are powerful tools of healing that can be used in conjunction with 5D technology.

Plasma recognizes and amplifies vibrations, so by using plasma technology with high frequency sound such as 432, 639, and 963hz can create powerful healing vibrations that help the cells release programming and density.

Light healing is also a powerful tool that can be harnessed with 5D technology. Colors such as rainbow, gold, emerald green, & violet create very powerful healing energies within the cells. The colors of the chakras can also be utilized to help cleanse certain parts of the vessel.

Sunlight & the codes and activations that come through the Sun and also the Moon, create vortexes of upgrades that can be integrated with healing technologies. Source has created these organic healing energies to help humanity evolve and integrate higher frequencies.
